

HR Analytics Dashboard Project Report

1. Introduction

HR Analytics helps organizations analyze workforce data to improve decision-making. This project uses Microsoft Excel to build an interactive HR Analytics Dashboard.

2. Problem Statement

Organizations often struggle to understand employee attrition and workforce trends. This dashboard provides insights into employee behavior and HR KPIs.

3. Objectives

Analyze employee attrition, salary, department, gender, experience, and provide an interactive KPI dashboard.

4. Dataset

Fields include Employee ID, Age, Gender, Department, Job Role, Monthly Income, Years at Company, Attrition and related HR attributes.

5. Tools Used

Microsoft Excel, Pivot Tables, Pivot Charts, Slicers, Conditional Formatting.

6. Data Cleaning

Removed duplicates, handled missing values, standardized text, checked data types.

7. Dashboard Features

Employee Attrition Rate, Salary Analysis, Department Analysis, Gender Distribution, Experience Analysis, KPI Dashboard.

8. KPI Explanation

KPIs include Total Employees, Attrition Rate, Average Salary, Average Experience, Active Employees.

9. Key Insights

Replace this section with insights from your completed dashboard (actual values).

10. Conclusion

The dashboard enables HR managers to monitor workforce trends and make data-driven decisions.

11. Future Scope

Integrate Power BI, predictive analytics, and real-time HR data.
